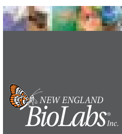
pTWIN1



1-800-632-7799
info@neb.com
www.neb.com

N6951S

10 µg **Lot: 0021302** **Exp: 2/16**

200 µg/ml **Store at –20°C**

Description: pTWIN1 is an *E. coli* expression vector which can be used with the IMPACT™ Kit (NEB #E6901). pTWIN vectors are designed for protein purification or for the isolation of proteins with an N-terminal cysteine and/or a C-terminal thioester (1). A polylinker in the vector is designed for the in-frame fusion of a target gene between the modified Ssp DnaB (2) and Mxe GyrA inteins (3). The presence of the chitin binding domain from *Bacillus circulans* (4,5) facilitates purification. The double-stranded vector is 7,375 base pairs in length.

Source: pTWIN1 contains two mini-inteins, one derived from the *Synechocystis sp* DnaB intein (154 amino acids) (6) and the other from the *Mycobacterium xenopi* GyrA intein (198 amino acids) (7).

Supplied in: 10 mM Tris-HCl (pH 8.0), 1 mM EDTA.

Features of pTWIN1:

- A pBR322 derivative
- The SapI sites should be used for directional cloning of both the 5´ and 3´ ends of an insert.

Polylinker Region: pTWIN1

- Expression of the fusion gene is under the control of the T7 promotor (8) and is regulated by IPTG due to the presence of a *lac*I gene.
- Expression requires an *E. coli* host that carries the T7 RNA Polymerase gene [e.g., T7 Express Competent *E. coli* (High Efficiency), (NEB #C2566) or BL21(DE3) Competent *E. coli*, (NEB #C2527) and derivatives].
- Origin of DNA replication from the bacteriophage M13 allows for the production of single-stranded DNA by helper phage superinfection of cells bearing the plasmid.
- Thiol-induced cleavage of the Mxe GyrA intein is dependent on the amino acids adjacent to the intein. The amino acid residues M or Y at the C-terminus of the target protein is recommended for use with this intein.
- Controllable cleavage of the Ssp DnaB intein is dependent on the amino acids adjacent to the intein. The amino acid residues CRA or GRA at the N-terminus of the target protein is recommended for use with this intein.
- Ampicillin resistance.

Recommended Buffers

- Cell Lysis Buffer: 50 mM Tris-HCl (pH 8.5) containing 500 mM NaCl.
- Ssp DnaB Intein Cleavage Buffer: 50 mM Tris-HCl (pH 6.0) containing 500 mM NaCl.
- Mxe GyrA Intein Cleavage Buffer: 50 mM Tris-HCl (pH 8.5) containing 500 mM NaCl and 50 mM 2-mercaptoethanesulfonic acid.

Additional information such as vector sequences and frequently asked questions, are available at www.neb.com.

This product is sold for research use only and not for resale in any form. Commercial use of this product may require a license. For license information, please contact the Licensing Office, New England Biolabs, Inc., 240 County Road, Ipswich, MA 01938.

RESEARCH USE ASSURANCE STATEMENT
The buyer and user have a non-exclusive sub-license to use this system or any component thereof for RESEARCH PURPOSES ONLY, based upon agreement to the following assurances:

Transfer of the host cells that contain the cloned copy of the T7 gene 1 to third parties is explicitly prohibited. This information applies to *E. coli* ER2566, ER2833, ER3011, ER3012, ER3013 and ER3021, SHuffle T7, SHuffle T7 *LysY*, SHuffle T7 Express, SHuffle T7 Express *LysY* and their competent derivatives, C2566, C2833, C3009, C3010, C3013, C3016, 3021, C3022, C3026, C3027, C3029 and C3030 when povided separately or when provided in combination with appropriate vectors for said systems.

A license to use this system or any components thereof for commercial purposes may be obtained from New England Biolabs, Inc.

Commercial Laboratory Buyer and User:
Use of the host cells ER2566, ER2833, C2566, C2833, C3009, C3010, C3013, C3016, C3021, C3022, C3026, C3027, C3029, C3030, SHuffle T7, SHuffle T7 *LysY*, SHuffle T7 Express, SHuffle T7 Express *LysY* or their competent derivatives that contain the cloned copy of T7 gene 1, the gene for T7 RNA polymerase for any purpose other than in combination with either a T7/MAL or T7/IMPACT vector is explicitly prohibited.

Use of the host cells that may contain the cloned copy of the T7 gene 1, the gene for T7 RNA polymerase with any other vector(s) containing a T7 promoter to direct the production of RNA or protein requires a license from Brookhaven National Laboratory. Information about research-use or commercial-use license agreement may be obtained from the Office of Intellectual Property and Sponsored Research, Brookhaven Natonal Laboratory, Buildng 475D, P.O. Box 5000, Upton, New York 11973-5000. Tel.: 631-344-7134. Fax: 631-344-3729.

You may refuse this non-exclusive research license agreement by returning the enclosed materials unused. By keeping or using the enclosed materials, you agree to be bound by the terms of this sub-license.

ACADEMIC AND NON-PROFIT LABORATORY ASSURANCE LETTER
The T7 expression system is based on technology developed at Brookhaven National Laboratory under contract with the U.S. Department of Energy and is the subect of patent applications assigned to Brookhaven Science Associates, LLC (BSA). BSA will grant a non-exclusive license for use of this technology, including the enclosed materials, based upon the following assurances:

1. These materials are to be used for non-commercial research purposes only. A separate license is required for any commercial use, including the use of these materials for research purposes or production purposes by any commercial entity. Information about commercial licenses may be obtained from the Office of Intellectual Property and Sponsored Research, Brookhaven National Laboratory, Building 475D, P.O. Box 5000, Upton, New York 11973-5000. Tel: 631-344-7134.
2. No materials that contain the cloned copy of T7 gene 1, the gene for T7 RNA polymerase, may be distributed further to third parties outside of your laboratory, unless recipient receives a copy of this license and agrees to be bound by the terms. This limitation applies to strains ER2566, ER2833, C2566, C2833, C3009, C3010, C3013, C3016, C3021, C3022, C3026, C3027, C3029, C3030, BL21(DE3), BL21(DE)pLysS and BL21(DE3)pLysE, SHuffle T7, SHuffle T7 *LysY*, SHuffle T7 Express, SHuffle T7 Express *LysY* and ther competent derivatives and any derivatives you may make of them, including such strains containing recombinant vectors.

You may refuse this license by returning the enclosed materials unused. By keeping or using the enclosed materials, you agree to be bound by the terms of this license.

U.S. Patent Nos. 5,496,714, 5,834,247
